28 May 2020

To whom it may concern,

The VECTOR vehicle you have procured contains embedded items that are subject to US export control regulations. This means that there are restrictions on the export of this vehicle to a foreign (non-US) nation.

The UK MOD has carried out a Commodity Jurisdiction (CJ) self-assessment in relation to this vehicle in order to establish the US export control status of both the vehicle and the items embedded within. This information is detailed within Enclosure 1.

The VECTOR is subject to a de minimis calculation of 2.65% at time of print. However, re-export from the UK for end-use in a country in Country Group E:1, E:2 and D:5 in Supplement 1 to Part 740 of the US Export Administration Regulations :

<https://www.bis.doc.gov/index.php/documents/regulation-docs/2255-supplement-no-1-to-part-740-country-groups-1/file>

would require authorization by the US Government.

This assessment has been undertaken with all available data. The assessment included within Enclosure 1 covers the basic VECTOR variant. A full analysis of all VECTOR variants (i.e. the VECTOR platform) could not be conducted at this time.

Items controlled under the US Export Administration Regulations (EAR) are regulated by the US Department of Commerce and further information can be found on their government website. Items controlled under the US International Traffic in Arms Regulations (ITAR) are regulated by the US Department of State Directorate of Defense Trade Controls (DDTC) and further information can be found on their government website. The owner of this vehicle must ensure these regulations are adhered to, and that any restrictions related to the item(s) identified within Enclosure 1 are understood, and complied with. Failure to do so could lead to a violation of the regulations.

Should any controlled materiel listed within Enclosure 1 be removed from the asset, it will need to be treated in accordance with the applicable regulation.

Whilst every care has been taken to ensure the information provided is accurate, upto date and complete, neither the UK MOD nor any of it's representatives accept any liability for any errors or omissions in the information. The information provided is not and will not be considered to be a contractual statement, and no guarantee of the accuracy is either given or implied. The UK MOD reserves the right to amend the information without notice. Ex-military/dual use items may also be subject to UK government export controls, further information can be obtained from the Export Control Joint Unit (ECJU) at exportcontrol.help@trade.gov.uk or 0207 215 4594.

If you require further advice regarding US export control regulations, this should be sought from the relevant US Department.
